Customer Overview/Background

Industry:
Financial Service

Licensed:
- GH Enterprise (GHE)
- GH Advanced Security (GHAS)

Users:
20,000 Developers

Repo Scope:
Unknown

Build Complexity:
Unknown

DevOps Maturity:

Phased Strategy

Plan & Build Excitement

Engage

Begin working with the customer to grow excitement in the account while assessing and planning. Efficiently use resources from both Sales and Customer Success to begin to educate the customer (and other regional customers).

- Complete Assessment & Plan
- Hold 1:Many Training Events
- Collaborate with Regional Sales & Customers
- Showcase Prior Successes

Deployment & Assistance

Adopt

Help the customer land with anchor Projects/Repos. Begin to document and establish a foundation Leverage services or partners for migration assistance.

- Leverage 1:1 Customer Meetings
- Help priority teams deploy & adopt
- Adopt across the enterprise
- ***Pitch Copilot as a part of the Plan***

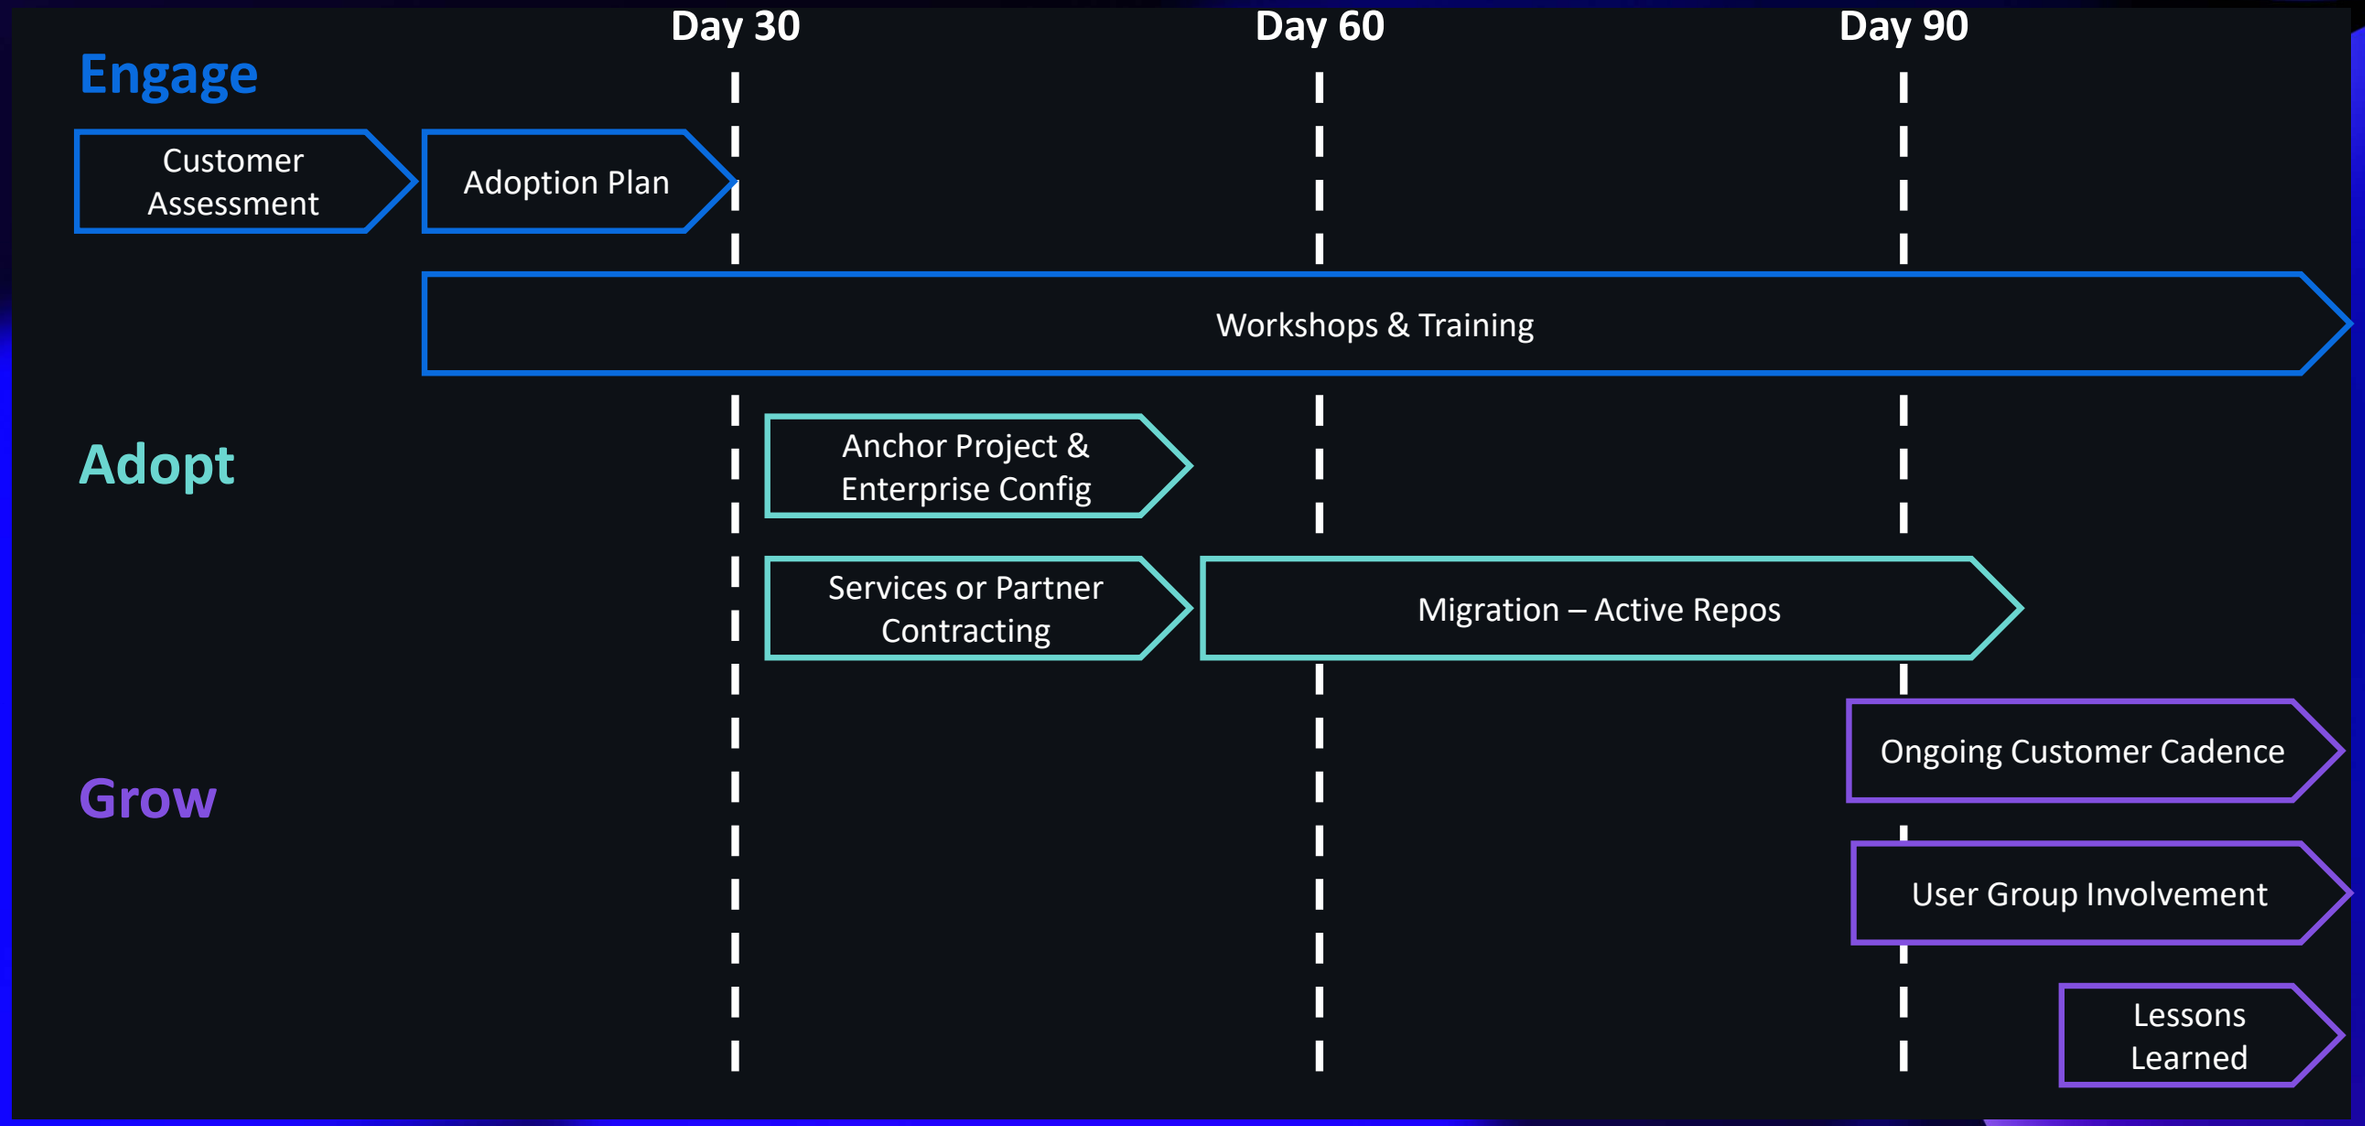
Maintain & Expand

Grow

Focus on customer health, continuing to educate the customer on new technologies and incorporate them into larger regional efforts. Allow them to showcase their success and provide product feedback.

- Focus on Customer Health & Upselling New Services
- Become the Beacon for the Next Customer
- Build a Larger & Healthy User Community

30/60/90 Day Plan



Tactics & Org Alignment

	Engage	Adopt	Grow
Tactics [Phase Actions]	• Assessment & Planning • Training Events • Company-wide events • Find Key Teams	• Establish GitHub Foundational Config • Migrate repos & pipelines	• Regional events • Company-wide events • Court Key Stakeholders • Develop new leads • User group participation
RACI - R&A	Customer Success	Customer Success	Sales
RACI - C	Sales	Services [or Partner]	Customer Success
RACI - I	PG & Services	PG & Sales	PG & Services
Key Milestones	• Customer Assessment • Adoption Plan • Anchor Team/Project Engaged	• Anchor Team/Project Complete • Enterprise/Org/User Setup Complete • Active Repos Migrated	• Lessons Learned Documented & Shared • Ongoing Customer Cadence Established • Upsell New Technologies

Potential Activities

	Benefits			GitHub Level of Effort		
Activity	Customer	Region	GitHub	Time	Cost	Owner
1-* Regional Workshops				Low	Low	CSA, SE or PG
Customer Workshops		-		Low	Low	CSA
1-1 Customer Assistance		-		High	Medium	CSA
Services/Partner Deployment		-		High	High	Services or Partner
Skills Challenge (Badges & Certs)				Medium	Medium	CSA or SE
User Groups & SIGs				Medium	Low	CS or PG
Customer Showcases				Low	Low	CS

= Training = Assistance = Peer Interactions = Usage = Feedback = Sales/Marketing

Potential Success Indicators

Engage Metrics

$$\boldsymbol{CustomerEngagement}\ \% = \frac{Total\ Unique\ Customer\ Employee\ Attendees}{GHE\ Licenses\ Purchased}$$

$$\boldsymbol{TeamEngagement}\ \% = \frac{Customer\ Teams\ Signed\ Up\ ForAdoption}{Total\ GHE\ Organizations}$$

Adopt Metrics

$$\boldsymbol{GheLicenseCoverage} = \frac{Number\ of\ Users\ Added\ To\ GHE}{GHE\ Licenses\ Purchased}$$

$$\boldsymbol{GhasLicenseCoverage} = \frac{Number\ of\ Active\ Developers}{GHAS\ Licenses\ Purchased}$$

$$\boldsymbol{Repo\ Migration}\ \% = \frac{Number\ of\ Repos\ Migrated}{(Legacy\ Repos\ - Inactive\ Repos)}$$

$$\boldsymbol{Pipeline\ Migration}\ \% = \frac{Number\ of\ Repos\ with\ Active\ Actions}{(Legacy\ Repos\ - Inactive\ Repos)}$$

Potential Success Indicators (Continued)

Grow Metrics

$$\textbf{Upsell Rate} = \frac{Value\ of\ All\ New\ Opportunities}{GHES\ License\ Value}$$

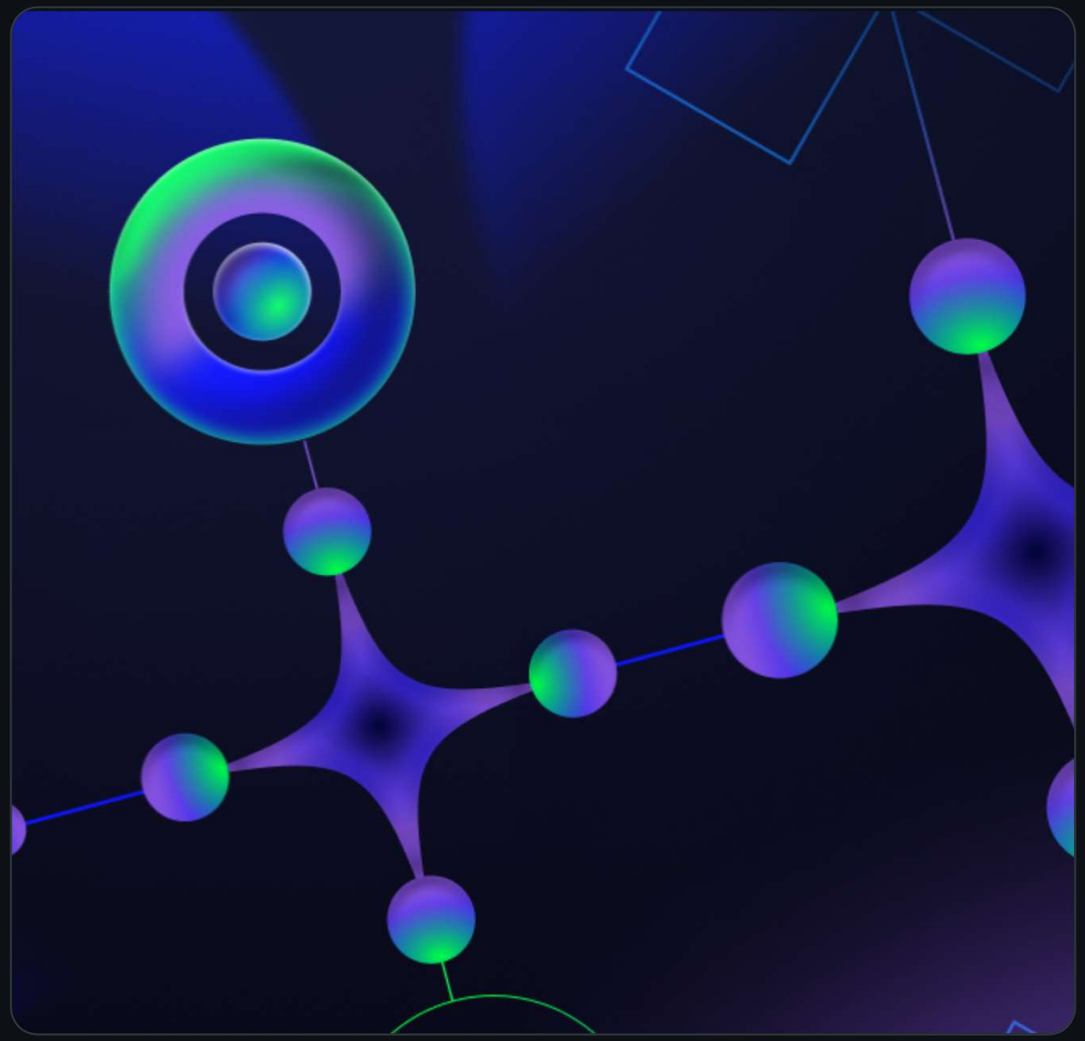
$$\textbf{Conversion}\ Rate = \frac{(Sold\ License\ Value\ - GHE\ Value\ - GHAS\ Value)}{Value\ of\ All\ New\ Opportunities}$$

$$\textbf{CS Pipeline Generated} = Value\ of\ All\ New\ Opportunities\ Created\ By\ CSM + CSA$$

General Customer Health Metrics

$$\textbf{Certification Pct} = \frac{Number\ of\ Certified\ Employees}{Number\ of\ GHE\ Licenses}$$

$$\textbf{User Group Involvement} = \frac{\#\ of\ Meetings\ Customer\ Attended}{\#\ of\ UG\ Meetings\ Held}$$



Recap/Summary

- Building Excitement and Enlisting Champions Critical for Adoption – Getting users excited about using the product is a major way to reduce friction.
- Upsell Copilot with Migration - With the volume of users, need every advantage. Use copilot as an accelerator to shorten the deployment timeline.
- Don't Wait – Try to run activities in parallel as much as possible to eliminate pauses.
- Anchor Team is Key – The first team deployed is needed to champion GitHub and help prove out enterprise configurations.
- Job Isn't Done at Deployment – Maintaining regular customer cadence and regional/industry involvement is an important indicator of health.
- Collaborate – Collaborate with Sales, Services, PG & Partners (e.g. Microsoft) to make customers successful.

Thank you!
